

ILLiad Automated Unfilled Server Addon

This is a Server Addon and is installed using the ILLiad Customization Manager. See [Installing and Configuring Server Addons](#) for more information.

Name	Automated Unfilled - ILLiad Server Addon
Version	1.0.0
Author	Atlas Systems
Description	The ILLiad Automated Unfilled server addon checks for ILLiad requests in a queue (i.e. Awaiting Unfilled Processing) and will automatically import the request into resubmission and then route the request into a new queue.

Download

Download zip file: [AutomatedUnfilled.zip](#)

Configuration

Addon settings are configured in the Manage Addons form.

Name	Default	Type	Description
UnfilledMonitorQueue	Awaiting Unfilled Processing	string	The queue that the addon will monitor for handling unfilled.
ErrorQueue	Automated Unfilled Error	string	The queue that the addon will route requests to if an error occurs while processing the unfilled request.
SuccessfullyProcessedQueue	Awaiting Resubmission Processing	string	The queue that the addon will route requests to after the import into resubmission was completed successfully.
